## **Full Automatic Flute Laminator**

### **YB-1300E/1450E/1650E**

This machine can be used in color printing corrugated paper and corrugated paper laminating, tissue using scale continuous paper feeding, unique front gauge positioning way to insure the bottom paper never advance. It is easy to operate and maintain.

**Features:**

1. Advanced automatic tracking technology, according to the paper automatically adjust the size of the relevant parameters, so that the machine running is always in the best condition;
2. Unique front gauge positioning system, accurate, the bottom paper never advance; advance with adjustable amount of paper;
3. Equipped with high precision high speed automatic feeder, strengthening type paper feeding device, feeding smoothly.
4. Using the principle of offset printing machine side plate positioning for about error correction paper stack of paper and feeding process;
5. At the end of the paper using automatic suction feeder, can adjust the size of the wind in the touch screen, and an optional belt humidifying function;
6. Spare layboy in the non-stop state pile under a pile of paper, along the rail into the elevator, high working efficiency;
7. Imported electrical components, to ensure the stability of the circuit system. PLC tracking technology, automatic fault alarm;
8. Full automatic glue supply system, can automatically add the loss of plastic, and with the glue recycling;
9. Independent tank control water circulation, ensure the bottom paper back and dry, cleaning roller, spout, back glue tank;
10. Single side adjustment of the pressure of the pressure roller, and equipped with a pressure scale display, the replacement of the end of the paper size adjustment in one step;

**Technical Parameters:**

Model	YB-1300E	YB-1450E	YB-1650E
Max Size	1300X1250mm	1450X1250mm	1650X1450mm
Mini Size	400X400mm	400X400mm	400X400mm
Liner Thickness	150-600g	150-600g	150-600g
Max Speed	7500 sheet/hour	7500 sheet/hour	7500 sheet/hour
Laminate Precision	± 1mm	± 1mm	± 1mm
Machine Size	11.5X2X2.4M	11.5X2.2X2.4M	11.5X2.4X2.4M
Machine weight	5000kg	5500kg	6000kg
Power	10KW/380V	11KW/380V	12KW/380V
Bottom Thickness	A、 B、 C、 E、 F Corrugated Paperboard
