Electric Paper-Pile Flip Carrier

印策（上海）贸易有限公司
INCHO (SHANGHAI) TRADING CO., LTD

It only has turning over function, but more efficient and easier to turn over than turning than by manual with electric assistance system. It takes only one minute to turn over the paper-pile and works as a forklift truck stacked paper to any one place.

Integrating paper-pile turning over and carry, adopting all-electric mode, Designed for printing and packaging enterprises to develop a new type of paper-pile flip, carry, hoisting, loading and unloading tools. The machine using advanced electronic stepless speed regulation system, stable performance, simple operation, function with electric hydraulic lifting, electric paper-pile two-way clamping, 180° positive and negative flip, electric truck etc. make the customers easily to solve the problem of flip double side printing paper. The whole machine adopts imported high quality steel as a door frame material, more durable, equipped with power battery, form a complete set of intelligent charger, the charging process without the specialist care.

Technical Parameters:

Model	DFZ-570/685	Machine width	790mm
Rate capacities	< 1000/1250kg	Machine height	1360/1530mm
Max. height of pallet fork	1200/1370mm	Radius of turning circle	2150mm
Min. height of pallet fork	810/900mm	Hydraulic motor	DC24/2.0
Min. fork terrain clearance	85mm	Drive motor	DC24/1.2
Fork outside distance	570/685mm	Battery	3+DC12V/210Ah (option)
Machine length	2480/2540mm	Charger	24V/30A
