Sheet Cutting Machine

HSC1400/1700

HSC high speed sheet cutting machine applies the advanced technique of Taiwan and Britain, The machine is transmitted by assisting motor. The speed of cutting paper is fast and stable. Germany precise bear and cutting knife assure the high cutting precision. Touch screen computer interface control, simple operation, reasonable structure, anti-music stands, to ensure smooth paper. This machine is the paper processing machine which is very popular in the paper making and printing industry and will improve the efficiency and benefit for your company to a large extent.

The content of standard configuration:

1. High-precision single knife cutting machine
2. Prismatic adjustment system for paper
3. Anti-statistic equipment
4. Middle slitting and waste collection system
5. Automatic counting and label inserting equipment
6. Paper transporting equipment
7. Automatic paper trimming and collecting machine
8. Electrical controlling system
9. Driving motor
10. Accessory
11. Double lime pneumatic shaftless paper rack
12. Automatic directing and paper tension controller
13. Automatic vacuum

Main Technical Parameter:

Model	HSC1400/1700
Reference weight of cutting-paper	50-550g
Model of cutting paper	The up knife cut reciprocally and the down knife is fixed
Cutting accuracy	The cutting length is below 1000mm
Gross weight	11,000kgs/13,000kgs
Total power	33kw
Power consumption	AC380V/220v×50HZ
Maximum cutting speed	300cuts/min
Maximum cutting meter speed	300m/min
Cutting length range	450~1450mm
Paper-piling height	1200mm
Maximum scroll diameter	1800mm(71")Max
Maximum paper-cutting width	1400mm/1700mm

印策（上海）贸易有限公司
INCHO (SHANGHAI) TRADING CO., LTD

The format of slitting	2 sheet
The request for air compressor	Max.5.5kg/cm ² x5m ³ /min
