

Dual-use Foil Stamping and Die-Cutting Machine TYMK-930 CE

Other size 930, 1040,1100,1200,1300,1400,1500 and 1600 available

Features:

1. Equipped with imported PLC and servo motor.
2. Main body was made of HT200 high strength cast iron, it has high strength.
3. Single disk electromagnetic clutch is sensitive and reliable.
4. The electrical system is designed according IEC standard.
5. The operation height is reasonably designed, the open angle of the pressing plate is big.
6. It has the function of single cutting, continuously cutting. The time delay of the pressing plate can be adjusted.
7. The torque of the gear is great, the pressing pressure is great.

Parameters:

Model	TYMK-930 CE
Max pressing size	930*660 mm
Max stamping size:	930*640 mm
Foil length	640 mm
Speed	23±2 s/min
Foil Groups	3
Heating area	5
Motor Power	4KW-4H
Total power	16.5KW
Weight	3300KG
Dimension	2000*1800*2100mm
